Dear Imnetu.

I am glad to send you the slides you ordered and some photos I took of Selome and you.

SLIDES: 16 NAK. 27kr + Post = 120kr.

I don't have much news about Pauls projects. We will probably not be able to trace the drilling rig, and I will informe Nerayo about this. SAIH is working with the brick & block project, but it appears to be very difficult to find a company to produce the machines.

The solar cell panels on the other hand are OK. I have written an users manual in english and some questions to follow the panels. They are stored in the container now. My questions are like: "Does the panel supply enough power?" "Where all goods received in good order?" etc.

I hope you are able to visit our place ^{if} you are in Oslo in December. We will be away some days, and I will spend christmas with my parents, but try to contact me there (tel 02-25 65 36).

Best regards !

Erik Anders

Remember that the copyright to the slides is mine.

Dear Immnetu!

I am glad to send you a copy of our magazine in which we have printed a few words about your articles.

I have just now returned from a successful journey to Eritrea and have my hands full of work. I happened to meet with people who knew you and am glad to send their regards. I met Andom in the agricultural dept. Nerayo at the hospital and several people living abroad.

I hope to see you if you visit Oslo in the near future. We will among different things have a inter - Scandinavian seminar on Eritrea and an open meeting in Oslo the 13th. of March. The seminar is scheduled to 15-16th. of March.

Best regards from Erik Anders Aurbakken.

Dear Erik:

Ref. to our telephone conversation of yesterday, I hereby attach and send my article entitled "Nature in Eritrea." I hope it can provide PERSPEKTIVE readers a glimpse of the Eritrean countryside. I have a variety of colored photos from the highlands and lowlands of Eritrea that can be used with the article. If there is a need for photos please contact Paul Prendergast and feel free to use any of the photos which are currently in his possession.

Best regards,

Emnetu Tesfay
