Bombay 400 054 India

Dear Sir:

By this letter We would like to request your assistance in providing us information on biogas appliances available in your firm. We are a group of Eritreans (North East Africa) living in Norway who are interested in introducing biogas systems among the rural communities of our country. In the wake of our investigation of the Indian model (Gobar Gas Plants) we came in contact with Kirloskar Oil Engines Ltd. of Pune, India who have provided us on their product. For the other appliances they advised us to contact your firm.

At present we are very much interested to obtain information about the various appliances used in biogas operation and their cost. Therefore we would like your office to send us catalogs, pamphlets or any document containing data on the stoves, engines, lamps available for this particular gas. Including the cost for each.

In addition to the documents, we would like your office to send us 2 samples of the lamps used for biogas lighting. Please send all of it in a package to the address given below in Stavanger, Norway and bill us. We will, ofcourse, pay the postal fee too.

We look forward for a quick response.

Best regards,

for the group, Emnetu Tesfay,
Digranesveien 15
4000 Stavanger
Norway
