Contents

TS-950SDX in detail:

Features at a glance:

Outstanding performance

Digital AF filters

Superior FSK transmission circuit.

Dual-frequency receive capability

Powerful menu system

Quick Memory

Automatic antenna tuner

First-rate receiver performance

High-performance CW functions

100 memory channels

Versatile scanning

Dimensions (W x H x D)

- 402 x 141 x 400 mm (15.83 x 5.55 x 15.75 in.)

Price offer:

Kenwood HF transceiver TS-430S	102.400 kroner
TRP 8250 S Marine SSB Radiotelephone	8.750 kroner

Forword

The telecommunication adventure actually started in 1985. At that point in time the only and easy option available to make direct telephone contact with the field was using radio telephone lines.

By buying a Kenwood transceiver with all necessary accessories and fitting long antenna the access to maritime link could be achieved. Using the transceiver it is possible to access the international network via Rogaland radio in Norway. Rogaland radio is a coastal radio station with VHF middlewave located in Sola kommune.

The shortcomings with the transceiver in our case will be:

- Its users in the field have to carry it to a high hill and ring from there.
- They can call anytime to reach a person in Europe for example, but to call them one must make an appointment first.
- The line is not always clear and those talking on the line will usual ask for repetation.
- The line is easily monitorable by the enemy so messages have to be coded.
