Inquiry Concerning Drilling Equipments

I am writing this letter of inquiry after obtaining your company's address from an Italian friend working for Snamprogetti here in Norway. A relief organization working to aid drought stricken people in Eritrea (North East Africa) is interested in purchasing a full set of drilling equipments for water wells. At present I am surveying the equipments available in the market before making a selection. We are particularly interested in the more developed, light in weight, easily mobile equipments.

I would therefore like to request your company to send me brochure of your water well drilling products. Besides I would appreciate receiving a list of the main equipments and auxiliary equipments necessary to drill and install water pipe. The list should contain the name and type of the equipment, weight and cost of each. Any other data or technical information about the equipments or its performance in earlier operations would be of great interest for us. Please send the mail to my address in Stavanger, Norway.

I look forward for a quick response.

Sincerely Yours,

Emnetu Tesfay

Thanks for your letter of June 7, 1984.

You will find, herewith enclosed, some papers (photos, drawings etc.) illustrating our cable unit for 100 - 130 depth. (MMR model)

Thirty rigs of this type have been sold to Lybia, one recently to Uganda through a charity organization.

As you will realize from the above documentation, it is a highly mobile and simple unit.

One rig like that is at the moment ready in our yard for immediate shipment.

We can supply of course different model of rigs, some of them illustrated in the brochures and leaflets we are sending you under separate cover.

Happy to furnish you with any additional information you might require, we are,

Very truly yours,

Dott. Ing. Mario Massarenti
Managing Director

re: Drilling equipment for waterwells

./.

Regarding our correspondence dd. April 10th and your letter of April 27th, in which you ask me for addresses of manufacturers of the above mentioned equipment. I herewith have the pleasure to send to you "IRO Netherlands Offshore Catalogue 1984", which is issued by the Netherlands Industrial Council for Oceanology.

I hope this catalogue will give you sufficient information answering your questions.

The Head of the Commercial section

J.P.C. Marinissen.
